George G. Vega Yon, Ph.D.

Research Associate Professor, Division of Epidemiology, University of Utah

g.vegayon@gmail.com · ggvy.cl · github.com/gvegayon · orcid.org/0000-0002-3171-0844

MAJOR AREAS OF RESEARCH INTEREST

Social Networks and Complex Systems · Network Science · Statistical Computing · Scientific Software Development · Mechanistic Machine Learning · Statistical Methods Development

EDUCATION

Ph.D. in Biostatistics (concentration in Statistical Computing) 2020

University of Southern California, USA
Dissertation: *Essays on Bioinformatics and Social Network Analysis: Statistical and Computational Methods for Complex Systems.*

M.Sc. in Social Sciences (concentration in Economics) 2016

California Institute of Technology, USA

Master in Economics and Public Policy 2011

Universidad Adolfo Ibáñez, Chile

B.S. in Business Administration (minor in Political Science) 2011

Universidad Adolfo Ibáñez, Chile

ACADEMIC AND PROFESSIONAL EXPERIENCE

Research Associate Professor July 2026 – Present

Division of Epidemiology, University of Utah

Adjunct Assistant Professor July 2026 – Present

Kahlert School of Computing, University of Utah

Adjunct Assistant Professor Jan 2023 – Present

Division of Population Health Sciences, University of Utah

Research Assistant Professor Nov 2021 – June 2026

Division of Epidemiology, University of Utah

Data Scientist (contractor) May 2024 – Dec 2025

Center for Forecasting and Outbreaks Analytics, CDC

Lead Data Scientist (Associate) Nov 2023 – May 2024

Booz Allen Hamilton

Research Programmer Feb 2018 – Nov 2021

Department of Preventive Medicine, University of Southern California

Programmer Analyst Oct 2015 – Feb 2018

Department of Preventive Medicine, University of Southern California

Graduate Student Researcher Aug 2011 – Oct 2015

Division of Social Sciences, California Institute of Technology

Analyst Aug 2011 – Aug 2014

Research Division, Chilean Pension Supervisor

Founding Partner Jan 2012 – Jan 2014

Nodos Chile Social Network Analysis Ltda.

Adjunct Professor of Statistical Computing Jan 2011 – Jun 2012

School of Government, Universidad Adolfo Ibáñez

AWARDS

Top paper award, International Communication Association 2022

Travel Grant, Society of Young Network Scientists 2019

Fellowship, California Institute of Technology 2014

Honorable Mention (Posters Session), Chilean Economics Society 2012

Scholarship, Universidad Adolfo Ibáñez 2006

SOFTWARE PACKAGES

Badges show total CRAN and npm downloads (1,067,308 across 20 packages), as of October 2026.

1. **Vega Yon, G. G.**, Fábrega Lacoa, J., & Kunst, J. *rgexf: Build, Import and Export GEXF Graph Files* (2026). R package version 0.17.0. doi:10.32614/CRAN.package.rgexf ↓655,424
2. **Vega Yon, G. G.**, Olivera Morales, A., & Valente, T. *netdiffuseR: Analysis of Diffusion and Contagion Processes on Networks* (2026). R package version 1.25.0. doi:10.32614/CRAN.package.netdiffuseR ↓58,885
3. **Vega Yon, G. G.** *aphylo: Statistical Inference of Annotated Phylogenetic Trees* (2026). R package version 0.3-6. doi:10.32614/CRAN.package.aphylo ↓20,645

4. **Vega Yon, G. G.**, & Bischoff, P. *netplot: Beautiful graph drawing* (2026). R package version 0.4-0. doi:10.32614/CRAN.package.netplot ↓23,218
5. **Vega Yon, G. G.** *barry: your to-go motif accountant* (2026). R package version 0.2.2. doi:10.32614/CRAN.package.barry ↓3,114
6. **Vega Yon, G. G.** *defm: Estimation and simulation of Multi-binary response models* (2026). R package version 0.2.1.0. doi:10.32614/CRAN.package.defm ↓3,007
7. Meyer, D., Pulsipher, A., & **Vega Yon, G. G.** *epiworldR: Fast Agent-Based Epi Models* (2026). R package version 0.14.0.0. doi:10.32614/CRAN.package.epiworldR ↓16,792
8. **Vega Yon, G. G.**, & Banks, O. *epiworldpy: Python Bindings for epiworld* (2026). Python package version 0.15.0-0. github.com/UofUEpiBio/epiworldpy
9. **Vega Yon, G. G.** *epiworldjs: epiworld Agent-Based Models in the Browser via WebAssembly* (2026). JavaScript package version 0.18.0-0. uofuepibio.github.io/epiworldjs/ ↓315
10. Toth, D., Wagoner, J., Ray, W., & **Vega Yon, G. G.** *multigroup.vaccine: Analyze Outbreak Models of Multi-Group Populations with Vaccination* (2026). R package version 0.1.1. epiforesite.github.io/multigroup-vaccine/ ↓2,057
11. **Vega Yon, G. G.** *measles: Measles Epidemiological Models* (2026). R package version 0.2.0. doi:10.32614/CRAN.package.measles ↓2,916
12. Najafzadehkhoei, S., **Vega Yon, G. G.**, & Modenesi, B. *epiworldRcalibrate: Fast and Effortless Calibration of Agent-Based Models using Machine Learning* (2026). R package version 0.1.4. doi:10.32614/CRAN.package.epiworldRcalibrate ↓1,852
13. Najafzadehkhoei, S., **Vega Yon, G. G.**, & Tanaka, K. *imaginarycss: Tools for Studying Imaginary Cognitive Social Structure* (2026). R package version 0.1.0. doi:10.32614/CRAN.package.imaginarycss ↓2,702
14. **Vega Yon, G. G.** *tabulergm: Publication-Ready Tables and Summaries for Exponential-Family Random Graph Models* (2026). R package version 0.1.0. doi:10.32614/CRAN.package.tabulergm ↓634
15. **Vega Yon, G. G.** *Agent-Based Modeling of Measles in US cities hosting the 2026 FIFA World Cup* (2026). epiforesite.github.io/idcup
16. **Vega Yon, G. G.** *AI-powered Dashboard to Explore the InsighNet community* (2026). epiforesite.github.io/insightnet-explorer/
17. **Vega Yon, G. G.** *ergm-js: Dependency-light Exponential Random Graph Model Simulator* (2026). JavaScript package version 0.3.0. gvegayon.github.io/ergm-js/ ↓564
18. **Vega Yon, G. G.** *ergm-widget: Interactive ERGM widget for Quarto* (2026). Quarto extension version 0.3.0-0. gvegayon.github.io/ergm-quarto/
19. Banks, O., Wang, E., Nelson, R., & **Vega Yon, G. G.** *EPICC: Epidemiological Cost Calculator* (2026). epiforesite.github.io/epicc/
20. **Vega Yon, G. G.**, & de la Haye, K. *ergmito: Exponential Random Graph Models for Small Networks* (2025). R package version 0.3-2. doi:10.32614/CRAN.package.ergmito ↓28,808
21. **Vega Yon, G. G.**, Meyer, D., & Pulsipher, A. *epiworldRShiny: Shiny interface for epiworldR* (2025). R package version 0.2.3. doi:10.32614/CRAN.package.epiworldRShiny ↓15,026
22. Banks, O., & **Vega Yon, G. G.** *epiworldweb: WebAssembly Port of epiworld* (2024). Web application version 0.0.1. github.com/UofUEpiBio/epiworldweb
23. Bayer, D., Morris, D. H., **Vega Yon, G. G.**, Martin, T., & Bidari, S. *PyRenew: A Package for Bayesian Renewal Modeling with JAX and NumPyro* (2024). Python package version 0.1.0. github.com/CDCgov/PyRenew
24. Johnson, K., Morris, D., Abbott, S., Bernal Zelaya, C., **Vega Yon, G. G.**, Bayer, D., Magee, A., & Olesen, S. *wwinference: Jointly infers infection dynamics from wastewater data and epidemiological indicators* (2024). R package version 0.1.1.99, https://cdcgov.github.io/ww-inference-model/. github.com/cdcgov/ww-inference-model/

25. **Vega Yon, G. G.** *slurmR: A Lightweight Wrapper for 'Slurm'* (2023). R package version 0.5-4. doi:10.32614/CRAN.package.slurmR ↓37,931
26. **Vega Yon, G. G.**, & Marjoram, P. *fmcmc: A friendly MCMC framework* (2023). R package version 0.5-2. doi:10.32614/CRAN.package.fmcmc ↓35,819
27. **Vega Yon, G. G.** *epiworld: A Flexible and General Agent Based Model Engine* (2022). C++ library version 0.0-1. github.com/UofUEpiBio/epiworld
28. **Vega Yon, G. G.** *pruner: Implementing the Felsenstein's Tree Pruning algorithm* (2020). C++ library version 0.0-1. github.com/USCbiostats/pruner
29. **Vega Yon, G. G.**, & Quistorff, B. *parallel: Stata Module for Parallel Computing* (2019). Stata Module version 1.20.0. github.com/gvegayon/parallel
30. **Vega Yon, G. G.** *googlePublicData: Working with Google's 'Public Data Explorer' DSPL Metadata Files* (2017). R package version 0.16.1. doi:10.32614/CRAN.package.googlePublicData ↓62,625

32. **Vega Yon, G. G.** *twitterreport: Out-of-the-box analysis and reporting tools for twitter* (2016). R package version 0.16. doi:10.5281/zenodo.44528

GRANTS

Advancing Exponential-Family Random Graph Model Estimation and Power Analysis for Biomedical and Public Health Research 2026-2028

1R21LM015164-01, National Library of Medicine (PI: Vega Yon). Role: PI. Total award: $361,710.
This project will develop new statistical methods to improve the estimation and study design of Exponential- family Random Graph Models (ERGMs), a widely used framework for modeling complex networks in biomedical, public health, and social sciences. By addressing convergence issues and creating the first power analysis framework for multi-network ERGMs, this research will enhance the reliability and reproducibility of network-based studies.

Quantum-Enhanced Epidemiological Modeling for Public Health Decision-Making 2026 – 2027

University of Utah Seed Grant (PIs: Vega Yon, Basu Roy). Role: Co-PI. Total award: $50,000.
Explores the potential of quantum computing to enhance epidemiological modeling and public health decision-making, by implementing a quantum-enhanced version of an epidemiological ABM.

Statistical Methods for Integrative Genomics in Cancer 07-01-2016 – 08-31-2027

5P01CA196569-08, National Cancer Institute (PIs: Gauderman, Siegmund). Role: Co-Investigator. 0.6 calendar months/year. Total award (incl. indirect): $12,894,663.
Develops novel statistical methods for integrating multi-omic data to address cancer etiology, prognosis, and treatment. I am Co-I on the project using evolutionary models for annotating genes.

Phenotypes of Epilepsy Etiology and Drug Resistance (PEER) 07-01-2023 – 06-30-2026

HT94252310221, U.S. Army Medical Research and Development Command (PI: Kennedy). Role: Co-Investigator. 1.8 calendar months/year. Total award (incl. indirect): $846,484.
Investigates the causes and mechanisms of epilepsy using new data science methods, generating risk scores for epilepsy after head injury among military personnel.

TRANSMIT: Training Research Acumen in Students Modeling Infectious Threats 09-30-2022 – 09-29-2025

5U01CK000675-01, National Center for Emerging and Zoonotic Infectious Diseases (PI: Keegan). Role: Co-Investigator. 0.3 calendar months/year. Total award (incl. indirect): $891,356.
A fellowship program training students in mathematical modeling and computational methods for the study of infectious diseases.

Under review

Optimizing Peer-Led Vaping Prevention Under Uncertain Influence and Missing Network Data 07-01-2027 – 06-30-2029

R21, National Institute on Drug Abuse (PI: Vega Yon). Role: PI. Submitted 10-16-2026. Total costs requested (incl. indirect): $405,706.
Uses synthetic school-network simulations to identify peer-leader selection rules for vaping-prevention trials under uncertain peer influence and incomplete friendship data.

Submitted but not funded

Improving our Predictive Capability of Gene Functions by Leveraging Biological Insights with Advanced Statistical Computing 12-01-2022 – 11-30-2027

1R01HG012878-01, National Human Genome Research Institute (PI: Vega Yon). Role: PI.
Uses discrete exponential-family models to build a mechanistic gene function evolution model incorporating biological processes such as neofunctionalization.

Building a Novel Prediction Framework Leveraging Biological Insights to Boost Machine Learning Algorithms for Annotating Gene Function 12-01-2023 – 11-30-2028

1R01HG012878-01A1, National Human Genome Research Institute (PI: Vega Yon). Role: PI.
Extends the model of function evolution using discrete exponential-family models, embedding it into a mechanistic machine learning framework.

TEACHING

(PHS 7045) Advanced Programming with R and HPC Fall 2024

The University of Utah, USA
Co-instructor, PHS Ph.D. Program

(PHS 7045) Advanced Programming with R and HPC Fall 2022

The University of Utah, USA
Co-instructor, PHS Ph.D. Program

(PM 566) Introduction to Health Data Science Fall 2021

University of Southern California, USA
Instructor, M.Sc. in Public Health Data Science

(PM 566) Introduction to Health Data Science Fall 2020

University of Southern California, USA
Co-instructor, M.Sc. in Public Health Data Science

Statistical Computing with Stata 2012

Universidad Adolfo Ibáñez, Chile
Instructor, Masters in Economics and Public Policy

Microeconomics 2012

Universidad Adolfo Ibáñez, Chile
Co-instructor, B.A. in Business Administration

Introduction to Economics 2011–2012

Universidad Adolfo Ibáñez, Chile
Co-instructor, B.A. in Business Administration

MENTORING AND ADVISING

Sima Najafzadehkhoei — Mentor, RA 2024 – Present

University of Utah, Population Health Sciences, Ph.D. in Biostatistics. Computational epidemiology, agent-based models and ML.

Anibal Olivera — Mentor, RA 2024 – Present

Universidad del Desarrollo, Chile, Ph.D. in Social Complexity. Network science and R package development.

Olivia Banks — Mentor, RA 2024 – Present

University of Utah, undergraduate double major in Computer Science and Cellular and Molecular Biology. Software development and computational epidemiology.

Eric Anto — Ph.D. Dissertation Committee Member 2023 – Present

University of Utah, Population Health Sciences, Biostatistics Ph.D. program.

Hyrum Thomas Diesen — Mentor, RA 2024 – 2025

University of Utah, School of Biological Sciences, Molecular Cellular Evolutionary Biology Ph.D. program.

Katherine Lawson Michod — Qualifying Exam Chair and Dissertation Committee Member 2022 – 2024

University of Utah, Population Health Sciences, Clinical and Translational Epidemiology Ph.D. program.

Derek Meyer — Supervisor, RA, and M.Sc. Dissertation Committee Member 2022 – 2024

University of Utah, Population Health Sciences. Agent-based models for epidemics.

Jacqueline M. Kent-Marvik — Mentor 2022 – 2024

University of Utah, Nursing School, Ph.D. Health Sciences. Network science and social network analysis.

Porter Bischoff — Mentor, RA Summer 2023

University of Utah + Utah Valley University, Summer Program for Undergraduate Research (SPUR). Network visualization using R.

Luis Lopez — Mentor 2022

NIH Postbac program. Exponential-family random graph models.

CONFERENCE TALKS AND WORKSHOPS

1. Artificial Intelligence for the Scientist in a Hurry. *Sunbelt Conference, 2026*, Daytona Beach, Florida, USA. (2026) (conference workshop, slides/announcement)
2. Understanding Diffusion with netdiffuseR (with Olivera, A., & Valente, T. W.). *Sunbelt Conference, 2026*, Daytona Beach, Florida, USA. (2026) (conference workshop, slides/materials/announcement)

3. Variability of ERGM fits influences epidemic simulation results: A case study of Monkeypox virus transmission and methods for robust scenario analysis (presented by Rosenblatt, S.; with Manuelpillai, B., Spicknall, I., Miller, P., Clay, P., Mistry, D., & Pollock, E.). *Sunbelt Conference, 2026*. (2026) (conference talk)
4. Expanding the ERGM Framework: Modeling Interrelated Health Outcomes with Jointly-Distributed Binary Data (with Valente, T. W., Kean, J., & Pugh, M. J.). *Sunbelt Conference, 2025*, Paris, France. (2025) (conference talk, slides/materials/announcement)
5. Understanding Diffusion with netdiffuseR (with Olivera, A., & Valente, T. W.). *Sunbelt Conference, 2025*, Paris, France. (2025) (conference workshop, slides/materials/announcement)
6. Automatic Calibration of Agent-Based Models using Deep Neural Networks (presented by Najafzadehkhoei, S.). *DELPHI Symposium 2024*, Salt Lake City, UT. (2024) (conference poster, slides/materials/announcement)
7. How does network structure in Agent-Based Models affect epidemiological parameters? A large simulation study (presented by Olivera, A.; with Zhang, C., Thomas, A., Samore, M., & Khader, K.). *CSS 2024 Santa Fe*, Santa Fe, NM. (2024) (conference poster, slides/materials/announcement)
8. epiworld: A fast multi-language library for epi ABMs (with Meyer, D., Banks, M., & Samore, M.). *Conference on Complex Systems, 2024*, Exeter, UK. (2024) (conference talk, slides/materials)
9. How Network Structure Affects Epidemiological Indicators in ABMs - A Large Simulation Study Featuring Artificial and Real-world Networks (with Samore, M., Khader, K., Zhang, C., & Thomas, A.). *INSNA Sunbelt 2023*, Portland, OR. (2023) (conference talk, slides/materials/announcement)
10. Simulating Complex Agent-Based Model with epiworldR: A fast and flexible ABM framework (with Meyer, D.). *INSNA Sunbelt 2023*, Portland, OR. (2023) (conference workshop, slides/materials/announcement)
11. Visualization tools for network science: Building beautiful graphs with netplot (presented by Bischoff, P.). *INSNA Sunbelt 2023*, Portland, OR. (2023) (conference poster, slides/materials/announcement)
12. The importance of interaction networks in long-term care facilities to reduce the equilibrium prevalence of infectious pathogens (presented by Samore, M.; with Khader, K., Kazemini, K., Chang, N., Visnovsky, L., Thomas, A., Haroldsen, C., Stratford, K., & Zhang, C.). *Sunbelt 2022*, Cairns, Australia. (2022) (conference talk, announcement)
13. Imaginary Network Motifs: Structural Patterns of False Positives and Negatives in Social Networks (presented by Tanaka, K.). *72th Annual Conference of the International Communication Association*, Paris, France. (2022) (conference talk, announcement)
14. Una Mirada General a los Modelos Cuantitativos de Redes Sociales. *VII Reunión Latinoamericana de Análisis de Redes Sociales*, Virtual. (2021) (conference talk, slides/materials)
15. Network Influence in Officer Firearm Use (presented by Ouellet, M.; with Hashimi, S.). *NETWORKS 2021 - A Joint Sunbelt and NetSci Conference*, Online. (2021) (conference talk)
16. Triads, Dyads, and Gene Functions - When Social Network Analysis Meets Phylogenetics. *NETWORKS 2021 - A Joint Sunbelt and NetSci Conference*, Online. (2021) (conference talk)
17. ERGMito Statistical Models for Small Team Social Networks (with Dinkjian, A., Hamm-Alvarez, S., & de la Haye, K.). *SciTS 2020*, Zoom. (2020) (conference talk, slides/video)
18. Exact Statistics and Semi-Parametric Tests for Small Network Data (with Slaughter, A., & de la Haye, K.). *IC2S2, 2019*, Amsterdam, NL. (2019) (conference talk, slides/materials)
19. Exact Statistics and Semi-Parametric Tests for Small Network Data (with Slaughter, A., & de la Haye, K.). *Sunbelt 2019*, Montreal, CA. (2019) (conference talk, slides/materials)
20. Small network statistics for the network science of teams (with de la Haye, K.). *NetSciX 2019, SCL*, Santiago, Chile. (2019) (conference talk, slides/materials)
21. Computacion de Alto Rendimiento con R. *satRday Santiago 2018*, Santiago, Chile. (2018) (conference workshop, slides/materials)
22. Big Problems for Small Networks: Small Network Statistics (with de la Haye, K.). *NASN 2018, DC*, Washington DC. (2018) (conference talk, slides/materials)

23. Uncomplicated Parallel Computing with Stata (presented by Quistorff, B.). *Stata Conference 2017*, Baltimore, MD. (2017) (conference talk, slides/materials)
24. Understanding Diffusion with netdiffuseR (with Valente, T. W.). *NASN 2017*, Washington DC. (2017) (conference workshop, slides/materials)
25. Diffusion of Smoking Initiation Among Diverse, Urban American Adolescents Over The High School Period (with de la Haye, K., Shin, H., & Valente, T.). *NASN 2017*, Washington DC. (2017) (conference talk, slides/materials)
26. Network Diffusion of Innovations in R: Introducing netdiffuseR (with Valente, T. W.). *IC2S2, 2016*, Evanston, IL. (2016) (conference poster, slides/materials)
27. Network Diffusion of Innovations in R: Introducing netdiffuseR (with Valente, T. W.). *useR! 2016*, Stanford, CA. (2016) (conference talk, slides/video/materials)
28. Understanding Diffusion with netdiffuseR (with Valente, T. W.). *Sunbelt Conference, 2016*, New Port Beach, CA. (2016) (conference workshop, slides/video/materials)
29. Just tired of endless loops! or parallel: Stata module for parallel computing. *Stata Conference, 2013*, New Orleans, LA. (2013) (conference talk, slides/materials)

INVITED TALKS

1. From Supercomputers to Health Departments. *Network Science Institute + Roux Institute*. (2026) (invited talk, slides/announcement)
2. Artificial Intelligence for the Scientist in a Hurry. *Summer Institute in Computational Social Science (SICSS-UF)*, Gainesville, Florida, USA. (2026) (invited talk, slides)
3. How can models help public health?: Reflections from a Modeler. *Epi Corner*. (2026) (invited talk, slides)
4. Machine Learning Sandwich for Agent-Based Models: Automatic calibration and post-processing adjustment for ABMs. *Methods talks*, Exeter, UK. (2024) (invited talk, slides/materials)
5. A Brief Introduction to High-Performance Computing: With Applications in R. *Methods talks*, Exeter, UK. (2024) (invited talk, slides/materials)
6. Exponential Random Graph Models: An Introduction. *Summer Institute in Computational Social Science*, Florida, USA. (2024) (invited talk, slides/materials)
7. 'La Muerte del Aprendizaje de Máquina' o 'cómo la teoría puede mejorar a las máquinas'. *Escuela de Verano de Sistemas Complejos*, Santiago, Chile. (2024) (invited talk, slides/materials)
8. What is a Scientist?. *Career Day 2023*, Sandy, UT. (2023) (invited talk, slides)
9. Power and multicollinearity in small networks: A discussion of "Tale of Two Datasets: Representativeness and Generalisability of Inference for Samples of Networks" by Krivitsky, Coletti & Hens. *Joint Statistical Meetings, 2023*, Toronto, Canada. (2023) (invited talk, slides/materials/announcement)
10. Network visualization (in R) with "netplot" and motif counting (in C++) with "barry". *SCI Seminar*, Salt Lake City, Utah. (2023) (invited talk, slides/materials/announcement)
11. Prediction of Gene Functions by Leveraging Biological Insights with Mechanistic Machine Learning. *University of Utah Data Science Seminar*, Salt Lake City, Utah. (2023) (invited talk, slides/video/materials/announcement)
12. Triadas, lazos y funciones genéticas: cuando las redes sociales y la filogenética se encuentran. *Seminario de Data Science*, Zoom. (2021) (invited talk, slides/video)
13. Triads, Dyads, and Gene Functions - When Social Network Analysis Meets Phylogenetics. *Computational Cancer Genomics Working Group Evening Lecture*, Zoom. (2021) (invited talk, slides/video/materials)
14. Predicción de funciones genéticas utilizando evidencia experimental y árboles filogenéticos: Un modelo evolutivo" o "Ciencia de datos en la práctica. *PUC Mathematical and Computational Engineering Seminars*, Zoom. (2020) (invited talk, slides/materials/announcement)

15. A Brief Introduction to Using R for High-Performance Computing. *Orange County R Users Group*, Irvine, CA. (2019) (invited talk, slides/video/materials/announcement)
16. Big Problems for Small Networks: Statistical Analysis of Small Networks and Team Performance (with de la Haye, K.). *UCI Social Network Research Group*, Irvine, CA. (2019) (invited talk, slides/materials/announcement)
17. Big Problems for Small Networks: Statistical Analysis of Small Networks and Team Performance (with de la Haye, K.). *SONIC Speaker*, Evanston, IL. (2019) (invited talk, slides/video/materials/announcement)
18. Estadística de Redes y Econometría Espacial (con R). *IMFD Summer School*, Santiago, Chile. (2018) (invited talk, slides/video/materials/announcement)

OTHER TALKS

1. Introduction to Exponential-Family Random Graph Models. *2nd Chilean Summer School about Social Network Research*, Santiago, Chile. (2026) (workshop, slides/materials)
2. Statistical Inference in Network Science: A short course. *3ra Escuela de Verano en Ciencias de la Complejidad Social*, Santiago, Chile. (2026) (workshop, slides/materials)
3. Introduction to Exponential-Family Random Graph Models. *1st Chilean Summer School about Social Network Research*, Santiago, Chile. (2024) (workshop, slides/materials)
4. Statistical Inference in Network Science: A short course. *Escuela de Verano de Sistemas Complejos*, Santiago, Chile. (2024) (workshop, slides/materials)
5. Mechanistic Machine Learning. *MInD2.0 Visit Harvard*, Salt Lake City, Utah. (2023) (talk, slides/materials)
6. A Crash course on git. *Happy Scientist Seminar*, Zoom. (2021) (workshop, slides/video/materials)
7. HPC with Slurm, R, and the slurmR R package. *Happy Scientist Seminar*, Zoom. (2021) (workshop, slides/video/materials)
8. Essays on Bioinformatics and Social Network Analysis: Statistical and Computational Methods for Complex Systems. *Doctoral Defense*, Zoom. (2020) (talk, slides/materials)
9. Essays on Bioinformatics and Social Network Analysis Statistical and Computational Methods for Complex Systems. *Biostats Seminars*, Los Angeles, CA. (2020) (talk, slides/video/materials)
10. slurmR workshop. *Happy Scientist Semminar Series*, Los Angeles, CA. (2020) (workshop, slides/materials)
11. Happy Scientist Seminar: Research Pipelines. *Happy Scientist Seminar*, Los Angeles, CA. (2019) (talk, slides/materials)
12. What drives social networks? A gentle introduction to exponential random graph models (with a focus on small networks). *East LA R User Group*, Los Angeles, CA. (2019) (talk, slides/materials)
13. Overview of Social Network Models. (2018) (talk, slides/materials)
14. A brief introduction to using R for high-performance computing. *East LA R User Group*, Los Angeles, CA. (2018) (talk, slides/materials)
15. R Bootcamp for Scientific Computing 2018 (with Barrett, M.). *R Bootcamp for Scientific Computing*, Los Angeles, CA. (2018) (workshop, slides/materials)
16. Introduction to R (for HPC users). *USC's HPCC workshop*, Los Angeles, CA. (2018) (workshop, slides/materials)
17. Intro to R. *USC's HPCC workshop*, Los Angeles, CA. (2018) (workshop, slides/materials)
18. Reproducible Research. *Health Behavior Research Students talk*, Los Angeles, CA. (2016) (talk, slides/materials)

HONORS AND SERVICES TO THE PROFESSION

Manuscript review (ad hoc). Journal of the American Statistical Association · American Sociological Review · Communications Physics · PLOS ONE · BMC Infectious Diseases · The Official Journal of the Society for Computational Economics

· The R Journal · The Stata Journal · Social Networks · Journal of Mathematical Sociology · Computer Methods and Programs in Biomedicine Update · Journal of Open Source Software · Bioinformatics

Abstract review. International Conference on Computational Social Science (2019–2021) · SUNBELT Conference (2016)

Panelist / discussant. "Learning tips for your PhD from other researchers in the community," Early and Middle Career Researchers (EMCRs) on Social Networks workshops, October 2023 · "JASA A&CS Special Invited Session: A Tale of Two Datasets — Representativeness and Generalisability of Inference for Samples of Networks," Joint Statistical Meetings (JSM), August 2023 · "Social Network Diffusion of Individual Behavior Change Interventions Virtual Workshop," National Institute on Aging, Division of Behavioral and Social Research, March 2022

Book review. *Microeconometrics and Matlab: An Introduction*, by Adams, Clarke and Quinn, Oxford University Press, 2015 · *Mastering Gephi Network Visualization*, by Ken Cherven, Packt Publishing, 2015 · *Network Graph Analysis and Visualization with Gephi*, by Ken Cherven, Packt Publishing, 2013

Memberships and organizing. Core member, University of Utah's Center for Data Science (2023–Present) · Lead, Network Science and Social Network Analysis at the U (NetSNAU) (2022–Present) · Member, Center for Applied Network Analysis (CANA) at USC (2016–Present) · Co-organizer, USC Networks Meeting (2020, 2021) · Founder, the first R Users Group in Chile (2013) · Co-organizer, East LA R User Group

TECHNICAL SKILLS

R · C++ · Python · LaTeX · SQL · XML · regex · Stata+Mata · VBA · Gephi · Pajek · Mathematica · MS Office · Git · Unix · Docker · Visual Studio Code
